First steps with Nix

| If you want to manage your system using Nix, see [home-manager Tutorial Series](#) (if you are on macOS or non-NixOS Linux) or [NixOS Tutorial Series](#) (if you are on NixOS).

| [!tip] Pinning nixpkgs To avoid the aforementioned automatic update, you can manually pin  the registry entry for nixpkgs. In [home-manager](#), we will see an automatic and declarative way  of doing this (through [flake inputs](#)).

| [!warning] Declarative package management This section explains how to install a package *imperatively*. For a better way of installing packages (*declaratively*), see [home-manager](#).
