A tour of Nix

16 / 35 Attribute sets: examples 2

Make `ex0` and `ex1` evaluate to true.

Note: See video [@youtube](https://youtube)

```nix
 1  let
 2    list = [ { name = "foo"; value = 123; }
 3             { name = "bar"; value = 456; } ];
 4    string = ''{"x": [1, 2, 3], "y": null}'';
 5  in
 6  {
 7    ex0 = builtins.listToAttrs list == { XXX };
 8    ex1 = builtins.fromJSON string == { XXX };
 9  }
10
```

reset   solution   run

```nix
let
  list = [ { name = "foo"; value = 123; }
           { name = "bar"; value = 456; } ];
  string = ''{"x": [1, 2, 3], "y": null}'';
in
{
  ex0 = builtins.listToAttrs list == {foo = 123; bar = 456;};
  ex1 = builtins.fromJSON string == {x = [1 2 3]; y = null;};
}
```
